

Lab Sheet - 7

Objective(s):

To understand programming with user defined functions.

Problems:

1. Write a program to find factorial of given integer using a function.
2. Write a program to find surface area of box using function.
3. Write a program to find maximum of two number using function.
4. Write a program to reverse a number using function.
5. Write a program to implement bubble sort using function.
6. Write a program to find factorial of number using recursion.
7. Write a program to generate first n terms of Fibonacci series using recursive function to return Nth term of series.
8. Write a program to search an item in a list of 10 numbers using function.
9. Write a program to display sum of digits of a number using function.
10. Write a program to find sum of two matrices passing matrices to the function.
