

## **Lab Sheet - 9**

### **Objective:**

To understand programming with pointers

### **Problems:**

1. Write a program to find the sum of all the elements of an array using pointers.
2. Write a program to swap two numbers using call by reference.
3. Write a program to allocate memory for an array using dynamic memory allocation, storing the values in the array and retrieving the values from the array.
4. Pass the structure student with member RollNo, Name, Address, Age & marks in physics, math into a function and read the structure member and display the values from the function (use structure pointer).
