

Lab Sheet 11

Objectives:

- To understand graphics in C.

Problems:

1. Write a program to draw different basic shapes: line, rectangle, circle, and ellipse using graphics functions.
2. Write a program to draw a smiley face using circle and arc functions.
3. Write a program to draw and fill a bar graph using `bar()` and `setfillstyle()` functions.
4. Write a program to create a simple animation of a moving car using graphics functions and delay.
5. Write a program to demonstrate different line styles, colors, and fill patterns available in C graphics.
